Did you know that you can make a difference in Alzheimer’s disease by joining a clinical trial? Join us for our Clinical Trials Spotlight, where you can learn about what it means to join a clinical trial, receive information about current and upcoming trials in Orange County, and meet with local researchers.

By joining a clinical trial, you will be able to:

- Access new treatments not yet available to the public
- Access study-related care, screenings, and tests at no cost
- Receive compensation for time and travel (most trials)
- Contribute to research that could change the course of Alzheimer’s disease

Upcoming Opportunities:

**Time:** Friday, October 21, 1:00 p.m. - 2:30 p.m.

**Location:** Alzheimer’s Orange County, 2515 McCabe Way, Irvine, CA 92614

**Name of Study:** MINDSET Study

**Short Description:** The MINDSET study is a Phase III clinical research trial evaluating an investigational medication, intepirdine (RVT-101), for the treatment of mild-to-moderate Alzheimer’s disease. Researchers are investigating how effective the combination of intepirdine (RVT-101) with donepezil (Aricept®) will be in helping patients’ cognition and ability to perform daily living activities, as compared with donepezil alone.

**Best for:** Individuals with mild-to-moderate Alzheimer’s disease between ages 50-85 and taking donepezil (Aricept®). Additional eligibility requirements apply. More info at www.alzheimersglobalstudy.com

No charge to attend. Light refreshments provided. RSVP at www.alzoc.org or (949)757-3721

The “Clinical Trial Spotlight” is for informational purposes only. Alzheimer’s Orange County does not endorse any particular clinical trial or research opportunity. Please talk with your physician before entering a trial to discuss the potential risks and benefits. For more information on how to select a trial, visit www.alzoc.org/research.
