Helping the Most Vulnerable:

An Inside Look Into Enhanced Care Management

What is ECM?

Alzheimer's Orange County's (AlzOC) Enhanced Care Management (ECM) services offer a whole-person approach to care that addresses both the clinical and non-clinical needs of Orange County residents with complex medical and aging concerns. Through ECM, AlzOC not only finds resources for the vulnerable older adults it serves, they go the extra step to coordinate calls and care directly with providers to ensure they get the help they need.

We don't just connect them to resources, we make sure people actually receive them.

What are the benefits?

In many cases seniors live alone or are caring for a partner who also has health issues. As a result, their lives are very complex. ECM gives them a partner that helps them find and get resources suited to their needs with hands-on support. Our goal is to keep them as healthy as we can in their own home, as independent in the community as possible, and to minimize preventable healthcare use by connecting them with other, more cost-effective services. Those enrolled can improve the quality and longevity of their life in a healthy way while also reducing the financial burden for them and providers, benefiting the healthcare system as a whole.

How is it making an impact?

ECM is achieving amazing results for some of the most vulnerable members of our community. We recently helped Salvador*, a 78-year-old man living alone with dementia, avoid eviction, reinstate his housing voucher, and access critical care. An ECM case manager coordinated with his doctor, nurse, IHSS, and landlord to improve his living conditions, safety, and health routine, ensuring he could remain safely housed and supported. This is just one of many success stories.

**Name has been changed to maintain confidentiality*

"You hope their life is better in this kind of program. We're actually seeing it in real time."

- Pamela Austin, VP of Memory Support Services

Impact Snapshot

Education

5,556 PEOPLE

Attended our educational classes so far this year. Our courses provide valuable tips, insights and training that **improve care**, create a more **educated workforce**, and **inform** our community about vital brain health, dementia and healthy aging topics that is creating a more dementia-friendly community.

Support Groups

OVER 60+ GROUPS INCLUDING

- In-person groups in 17 different cities across OC
- Groups in English, Spanish, Korean and Mandarin
- Faith-based groups
- Special support groups for unique needs and other forms of dementia

MEASURING OUR IMPACT SO FAR IN 2025

We've provided
17,982 hours of free
education online and
in-person

1,002 people
have attended
one of our brain
health classes

We've provided
4,632 hours of
support
groups services

We've helped
2,717 callers and
given **300** care
consultations

Adult Day Health Center

Healthy Aging Center: Acacia offers daytime assistance to hundreds, promoting healthy aging in an enriching environment—at a fraction of skilled-nursing facility costs—giving participants the care they need and their families a break from caregiving.

"The care my mom receives has made a huge difference in her life. My mom is much happier and healthier because of them." — Ngoc Bao Han Dang

Alzheimer's in Orange County:

THE GROWING IMPACT ON OUR COMMUNITY

164,346

Orange County residents have some form of memory loss.

Only

2.43 Million

people nationwide are being treated for Alzheimer's and related dementias —yet up **10.8 million** are affected.

1.6 Million Californians

provide 1.8 billion hours of unpaid care valued at \$24+ billion.

WHY IT MATTERS:

Cognitive disorders without a cure already affect many. Even more will be impacted as our older population rapidly grows.

WHY IT MATTERS:

Due to stigma, cost, or lack of awareness, millions miss out on vital support that could improve their lives.

WHY IT MATTERS:

Caregivers shoulder immense burdens. More resources, respite care, and support are essential to sustain those who give so much.
